

A photograph of a modern, multi-story glass office building with a curved facade, set against a clear blue sky. A paved walkway and greenery are visible in the foreground.

# Optimise performance and comply with AASB 16

## Solution Overview

ProLease provides clients with a complete end-to-end solution for lease accounting and lease administration. Track your real estate and equipment leases, manage day-to-day changes, and comply with the new AASB lease accounting guidelines, all on one platform. No other solution has been as thoroughly researched to provide a powerful, intuitive platform that's fully compliant with AASB 16.

## Key Features

- Track all lease types including real estate, vehicles, office/IT equipment, machinery and more
- Capture key lease details and link to source documents
- Comprehensive, compliant accounting for property and equipment leases
- Maintain both lease and asset level accounting to manage single and master leases effectively
- Perform lease classification tests
- Generate journal entries and disclosure reports
- Easy integration with ERP systems
- Integrate with additional ProLease solutions for Workplace and Maintenance management.
- 100% SaaS solution ensures all new features and reports are deployed

## Business Benefits

- Intuitive user interface for efficient data management
- Never miss critical lease date with automated email alerts
- Comply with new lease accounting standards with confidence
- Easily update capitalisation schedule calculations based on lease modifications
- Evaluate the impact to the balance sheet from new leases, amendments or modifications
- Ensure a complete picture of property and equipment leases with a single source of information
- Deliver required transparency with reporting, audit trail capability, and detailed notes that demonstrate how each number is calculated
- Multi-currency capabilities enable a single system for international organisations
